## **www.iaa.org**

WEO-2017 Special Report: Energy Access Outlook. At the same time, the declining cost of decentralised renewables, increased access to affordable energyefficient appliances and the use of mobile platforms are changing the way we think about providing energy access. It is against this backdrop that the IEA produced this Special Report, part of its flagship World Energy Outlook (WEO) series.

## **World Energy Outlook 2017: A world in transformation**

IEA World Energy Outlook 2017 Describes “A World In Transformation”. This growth is driven by economic growth of 3.4% per year, population growth from 7.4 billion today to more than 9 billion, and a process of urbanization that beggars belief — adding a city the size of Shanghai to the world’s urban population every four months.

## **World Energy Outlook 2017 lea**

Four large-scale shifts in the global energy system set the scene for the World Energy Outlook 2017: the rapid deployment and falling costs of clean energy technologies, the growing electrification of energy, the shift to a more services-oriented economy and a cleaner energy mix in China, and the resilience of shale gas and tight oil in the United States.

## **IEA webstore. World Energy Outlook 2017**

A world in transformation: World Energy Outlook 2017 14 November 2017 The resurgence in oil and gas production from the United States, deep declines in the cost of renewables and growing electrification are changing the face of the global energy system and upending traditional ways of meeting energy demand, according to the World Energy Outlook 2017 .
