Some quadratic expressions can be factored as perfect squares. For example, $x^2+6x+9=(x+3)^2$. However, even if an expression isn't a perfect square, we can turn it into one by adding a constant number. For example, x^2+6x+5 isn't a perfect square, but if we add 4 we get $(x+3)^2$. This, in essence, is the method of *completing the square*

Equation of a Line Passing Through Two Points Worksheets

The printable translating phrases worksheets in this page provide prolific practice to 6th grade, 7th grade, and 8th grade students on expressing the phrases as algebraic expressions like linear expressions, single & multiple variable expressions, and writing the sentences as equations and inequalities.

Completing the square (video) | Khan Academy

The order of operations is the steps used to simplify any mathematical expression. In this video, learn how to solve problems using these steps and easy tricks to remember them.

Classkick

On these printable worksheets, students will practice solving, finding intercepts, and graphing linear equations. Finding Intercepts of Linear Equations Solve to find the x- and y-intercepts.

Linear Equations (Worksheets)

Equation of a Line: Standard Form - Level 2. Use the given two points, (x_1, y_1) and (x_2, y_2) to find the slope and apply point-slope formula to write the equation of a line. Express the equation in standard form. The coordinates in this batch of worksheets for grade 8 and high school, are given in the form of fractions.

Writing Algebraic Equations - Math Goodies

Classkick is a free app that shows teachers in real-time exactly what students are doing and who needs help so they can provide instant feedback.

Writing Complete Equations Practice Worksheet
